

Usage and Maintenance

- ⊗ Please don't disassemble the sealed head, doing so can cause damage to the flashlight.
- ⊗ High-power flashlights need batteries capable of high current electric discharge. We strongly recommend use rechargeable batteries for their high performance.
- ⊗ Please take your battery out of the flashlight if you will not use the light for a long time, or the power of the battery has run out. Otherwise, some poor batteries may leak and damage the light.
- ⊗ Please replace the O-ring if it becomes damaged after using for a long time, and regularly lubricate the O-rings so as to not erode the rubber. Doing so will also keep the flashlight properly sealed against water;
- ⊗ Clean the contacts of your light periodically, especially when the flashlight flickers abnormally or cannot light up. There may be several reasons as follows:

Reason 1: the batteries need to be replaced

Solution: replace batteries (confirm the correct installation of anode and cathode).

Reason 2: The threads, PCB board contact or other contacts are dirty.

Solution: clean the contact points with an alcohol soaked cotton swab.

If the above methods do not solve the issue, contact your distributor and refer to the warranty policy.

L³ Illumination

Taking your illumination needs to the next power

About L³ Illumination L10

- ⊗ L³ Illumination L10 is the perfect portable AA flashlight. In a very small size, since 1 AA battery delivers 3 times the electrical volume of one AAA battery, the L10 offers a brighter beam and much longer runtime with L³ Illumination's advanced lighting technology.
- ⊗ Furthermore, the design featuring four modes of output with simply operation, you can get firely mode, lower, high brightness and strobe by simply rotating the head part.
- ⊗ If you are looking for a powerful, long running EDC flashlight in the smallest size, L³ Illumination L10 is your perfect companion.

2

Features

- ⊗ Four types of output:
 - firely (0.09 lumens 147 hours)
 - low (3 lumens 50 hours)
 - medium (60 lumens 2 hours 35 minutes)
 - high (120 lumens 1 hour 40 minutes)
- ⊗ Max beam length: 50 metres
- ⊗ Impact resistance: 1.5 metres
- ⊗ Waterproof to IPX8 standard.
- ⊗ Cree XP-G LED (R5) with lifespan of 50,000 hours
- ⊗ Uses one 1.5V AA battery
- ⊗ Size: 79 mm (length) x 17.1 mm (diameter)
- ⊗ 20-gram weight (excluding battery).
- ⊗ Reliable twist switch,
- ⊗ Capable of standing up securely on a flat surface to serve as a candle;
- ⊗ Made of durable aircraft-grade aluminum;
- ⊗ Premium Type III hard-anodized anti-abrasive finish;
- ⊗ Toughened ultra-clear glass lens with anti-reflective coating.

Notice: The above-mentioned parameters (tested with a 1200mAh Ni-MH battery) are approximate and may vary between flashlights, batteries, and environments.
